\$1.00 PER YEAR.

## LOCALETS

Mr. Trickey, Alberta manager for the Massey-Harris Company, paid the local agency a visit this week while on a tour of inspection throughout the Southern Alberta territory. He states that while fairly good crops are being threshed on the MacLeod and Aldersyde branches, conditions here are far superior than in some districts in the dry belt. War munitions are crippling the implement service and the outlook for next year's deliveries is anything but bright. However, victory is the first consideration.

The Lomond Rebekahs will attend divine service as an order on Sunday evening, Oct. 6th. All members, visiting Rebekahs and brother Odd Fellows are particularly invited to attend. The lodge will congregate in the hall at 7:00 o'clock. Special music will be provided by a Rebekah choir and the pastor will preach from a topic appropriate to the

## H. H. HALADAY LENDING HIS ASSISTANCE TOWARDS HOLDING THE TWICE-A-WEEK TRAIN SERVICE.

THE PRESS is in receipt of a communication from Mr. H. H. Halladay, setting forth his efforts to retain the train service on this line at two trains per week. It appears that the order effecting the service came from War Board with the evident intention to save coal.

To us it appears that the C.P.R. was lurking behind the War Board. The idea of being so

economical of coal right at the mouth of the coal mine does not go down easily here.

Here's power to Mr. Halladay in his good work, and we are glad to be able to set before the people his activities on behalf of this cause.

## Kitchener was right

when he said—

*"Either the Civilian population must go short of many things to which it is accustomed in times of peace or our armies must go short of munitions and other things indispensable to them."*

NOW, the only way we can possibly live up to that obligation is by going without in order that our soldiers may have. For the money we waste is not money at all—it is equipment, clothing, shot and shell that are urgently needed in France.

By denying ourselves, therefore, we enable Canada to procure to the fullest extent the materials and labor which she and our Allies need for the successful prosecution of the war.

What happens when we fail to save?

A pull on labor by the Government in one direction and a pull on labor by the people in the opposite

direction. Hundreds of millions of dollars are of no use to the country if goods and services can be secured only to the extent of eighty millions of dollars. So we must do everything in our power to release both goods and labor for the purposes for which Canada needs them.

WHETHER it be food, coal, wool, steel, leather, labor or transportation, the result in all cases is the same. Whoever competes with the nation by freely satisfying his own desires, selfishly appropriates to his own use that which is so urgently required for our fighting men in France.

*For the sake of your country and the boys "over there," spend cautiously. Think of what Lord Kitchener has said, and ask yourself first, "Is this something I really need or can I do without it?"*

### NOTES

Just as we had the last form on the press last week, A. C. Little dropped in to tell us that work was progressing on the north road. Naturally, we were as tickled as a boy with a new pair of boots, to think that all the farmers out north would have a chance to lay in a good fat grub-stake for the winter. We rushed down town to put the wary merchants wise, when comptroller Elves spilled the cold water and told us the extent of the appropriation. Just an even hundred! The longest way 'round was the shortest way home—we pulled in back of the Chinese laundry and got in the rear window.

o o o

It perhaps would have looked better if the schools had closed on Tuesday afternoon during the time of the funeral out of respect for the deceased pupil.

o o o

Don't wait till you have an attack of appendicitis to begin making provision for a hospital.

### EXPERIMENTS AND TESTS

The annual report of the dominion experimental farms for the year ending March 31st., 1917, is a comprehensive document of some 150 pages, containing matter well worth studying by progressive farmers. It describes briefly and concisely the experiments and tests which have taken place at every farm and station, which practically means all over the country, seeing that every province is represented. Just as there is not a branch of agriculture undealt with, so there is not a district the capabilities and possibilities of which have not been tried in the matter of better production by improved methods. In former years the report has been given in two and three volumes and contained accounts of the scientific experiments that have been made during the year, or that were still in progress, written by professional experts of the experimental farm system, but henceforth these are to be given in bulletin form and the Report confined to statements of the year's doings at the score and more farms and stations at different parts of the country. The report, which, as has been said, will well repay study, can be had free on application to the Publication Branch, Department of Agriculture, Ottawa.

Monday, Oct. 14th., will be observed as Thanksgiving Day.

# Take This 15 to 25 Per Cent.

----it's what we saved you on our advanced buying. A year ago we anticipated the needs of this district and, knowing the markets as we do, we determined to save ourselves and our customers against the 25 to 35 per cent. increase on this year's goods.

Winter goods of real quality are about as plentiful as hens' teeth, and the prices have gone out of sight. But, in common with a very few other stores in this country, we have now got the goods at a fair price---- and the goods we still stand back of.

## GIVE YOUR COUNTRY A LEG UP ---SAVE!

Canadian patriotism demands the practice of thrift by all her sons. The men who are holding the lines at home are they who are making it easy for the business of the country to go on with little jar to its mechanism. The steady pulling together of all citizens in the production of goods and in the conservation of all field crops marks the thrifty nation. Saving on the part of our citizens is going to be the greatest insurance we will have in Canada against a period of depression after the war. The combined capital of the individuals who make the country will form a fund of sufficient power to drive business along in a most satisfying way in spite of the prevailing hard times of such a period.

The saving man is therefore a real patriot. He has Canada's interests fundamentally at heart. May his tribe increase in these days when wealth is piling up under the spur of war-time efforts. Save because it hits both ways. It is a high form of patriotism. And it gives one's country a leg up in a critical time. Put by that extra dollar now. The long procession of thrifty dollars will make a line that will not waver ---Hindenburg or no Hindenburg.
